

# PHIL'S PEN STUDIO

Phil Morris was turned on to pen turning by a family friend and was hooked almost immediately. Phil's Pen Studio is located in his home where he is able to mix practice, patience and passion to improve upon his original creations.

His goal is to design new and creative custom pens from a variety of materials. Currently, he is working with materials ranging from drift wood, aluminum scraps and plastics to antlers, bones and other exotic woods and acrylics to complete new and unique designs.

Phil has explored and expanded his knowledge in segmented work. As recently as February, he won 1<sup>st</sup> place on the International Association of Pen Turners Website in the Intermediate Pen Category for his segmenting work. Since that time he has had the honor of being the keynote speaker at the Alabama Wood Turners Association demonstrating Casting Acrylic Pen Blanks and Finishing Techniques; both of which are currently available on CD.

Phil lives in Columbiana, Alabama with his wife, Charity, and their two children, Wally and Molly.
